EQUIP YOUR MANAGERS WITH THE TOOLS TO TRULY MANAGE

The perfect store doesn't happen on it's own. With Incident Management you'll have the tools to capture incidents, review with video, and track the issues in your business that affect your culture and profitability.

Don't let important situations fall through the cracks. Track conversations alongside video within a closed-loop case management system.

- 1. Quickly preview all incidents in one place.
- 2. Click on individual incidents to view dialogue + video validation
- 3. Achieve trackable conversations and resolutions
- 4. Close and save incident for future reference

...it also gives us an opportunity to approach crew members with concrete evidence to discuss a situation and resolve it quickly– either with discipline or by taking steps to protect them–without having to resort to hearsay.

TRUSTED BY NAMES YOU KNOW

CREATE A FOUNDATION OF HONESTY AND ACCOUNTABILITY WITH A CLOSED-LOOP CASE MANAGEMENT SYSTEM.

Incident Management allows you to do more than save video clips. It provides the ability to flag Theft, Loss, or Operational issues and drive accountability in your restaurant or retail store.
