

## Envysion Insight Service Description

### Managed Video as a Service: Envysion Insight

Envysion's Managed Video as a Service (MVaaS) enables multi-unit operators to easily leverage remote video to better understand their business and improve profitability 10-15%. The highly scalable, centrally managed and bandwidth sensitive service is designed for everyday use by 1,000s of users across multiple departments without straining the IT organization or network.

Envysion Insight goes beyond traditional security and loss prevention applications by integrating with business systems, such as Point of Sale (POS) and access control systems to provide a robust set of exception reporting, alerting and event search capabilities. This feature, together with data integration, enables operators to efficiently focus on actionable business insight and translates to rapid operations and profit improvement.

### Product Features

#### ● Easy-to-Use Web Interface

Maximize usage and minimize training time with an intuitive web browser interface.

#### ● Powerful Search Capabilities

Save time with video search by date/time, POS transaction data or specific motion.

#### ● Customized Reporting

Develop custom reports (e.g., by store or employee) on key performance metrics and to highlight exception transactions.

#### ● Automatic User-Defined E-mail Alerts

Receive an e-mail alert when a business rule has been violated (such as number of voids per day or discount percentage).

#### ● Secure Video Clip Sharing

Create user groups and share video securely. Burning video to DVDs is a thing of the past.

#### ● Scalable, Centralized Administration

Centrally manage and monitor who can access video, and what they can access.

#### ● Automatic Upgrades

Automatic access to the latest features. Eliminate the burden of software upgrades.

Contact us today to learn how video-driven insight can improve your pro tability 10-15%.
