

# Verify Incidents Faster with Integrated Video and Data

Business owners and operators need visibility into their stores to monitor activities and mitigate risk, but no one has time to watch hours of surveillance footage or sift through stacks of transaction reports. Save time and increase effectiveness with Envysion's video-integrated exception-based reporting tools.

## TAKE DECISIVE ACTION, FASTER

Streamline investigations with all the data you need at your fingertips.

### Save Time

Forget sifting through stacks of exception reports and focus on those few events that truly impact your bottom line.

### Arrive at Firm Conclusions

It's risky to rely on *just* video or *just* transaction data to uncover loss. **Use both** to make your investigations airtight.

### Take Decisive Action

In mere minutes, you can identify, validate, and resolve loss and operational issues via one integrated platform.

*“We use Envysion on a daily basis and we have Envysion integrated with our checks and balances systems, we can ping down to a ticket and get a clip of what happened with that ticket, which is absolutely wonderful. Envysion has really been an asset to our restaurants and I love it.”*

*Allyson Banks, Quality Restaurant Group*

### TRUSTED BY NAMES YOU KNOW

# Gain actionable information on *your* terms

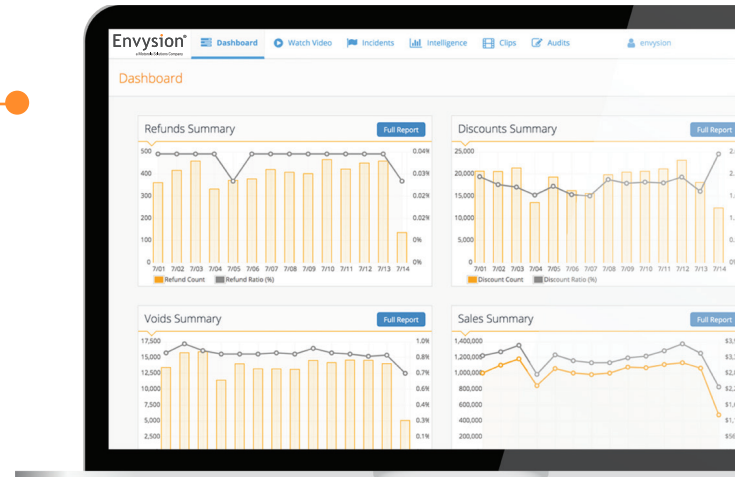

Cut through the noise and focus on the exceptions that actually need your attention. Keep your finger on the pulse of what matters most to you with customizable reports and system notifications.

## Monitor Trends with Dashboard Widgets

Quickly gauge the health of your business at login with homepage dashboard widgets. See summaries of discounts, refunds, sales, and voids across your restaurants. Interactive graphs allow you to easily drill down to the underlying report data.

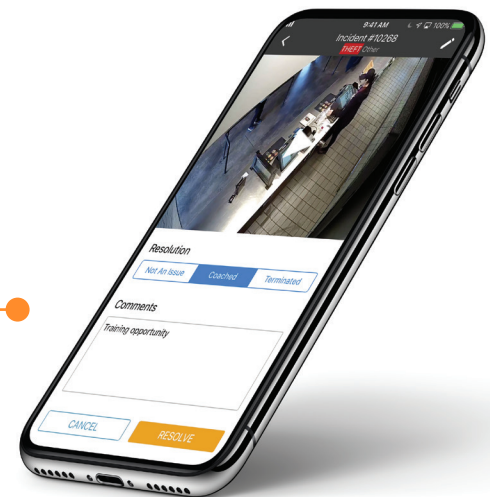

**5 Voids need your attention.**

## Customize Reports & Notifications to Focus on What Matters Most

Flexible report parameters allow for capturing the specific exceptions that you care about most. Receive only the updates you need with customizable report notification settings.

## Manage and Resolve Incidents in Your Store

Easily create and track incidents of employee theft, loss, or operational issues in your stores with Incident Management. Share incidents with team members to ensure timely resolution, and log notes for transparency and future reference.
